

NOVALOK

ADVANCING INNOVATION

DURABLE & SECURE DESIGN

Great for managing and separating products.

Novex Panels.

Durable Polymer Alloy Shelf Panels

Novaloks popular 200mm wide polymer alloy shelf panels with vented open grid surface. Standard depths of the Novex panels are 300mm, 450mm and 600mm. Available in Charcoal and Cloud (light grey) as standard colours. Novex is the recommended option for cool-rooms, freezer, food storage and healthcare.

Novex panel shelves can be easily fitted with dividers and retainers to help manage product separation. The dividers are also useful as supports for the side and back of shelves when the dropping of products from the shelves is to be avoided.

In considering methods for sterilization procedures, it is important to differentiate between sterilization and disinfection. Sterilization kills all viable microorganisms. Disinfection only reduces the number of viable microorganisms. Commonly used disinfectants include alcohol, iodophors, quaternary ammonium. Use discretion when choosing which cleaning chemical applies to the particular application.

NOVEX PANEL FEATURES

- Light weight and extremely durable
- Excellent ventilation properties
- Easy to remove and clean
- Smooth crevice-free top for ultimate hygiene
- Suitable for -20c to 100c conditions
- Standard shelf depths are 300mm, 450mm and 600mm
- Dishwasher safe
- 40kg UDL weight capacity per panel
- Acid and Alkali resistant
- Able to take wire dividers for separating products
- Suitable for sterile storage
- 5 year guarantee
