

NOVALOK

ADVANCING INNOVATION

ADJUSTABLE | MODULAR
HEAVY DUTY DESIGN
with easy gravitational sliding

Mass Flow Shelving.

A fully modular clip together system with adjustable shelf levels ideal for use in stadiums, petrol stations, retail outlets & refrigerated retail display cabinets.

Novalok "MassFlow" is a fully modular sloping shelf system that uses gravity to ensure that the product is always on display at the front edge of the shelf without tipping over.

"MassFlow" incorporates Novalok's "Duoguard" finish which is guaranteed for 5 years against faulty workmanship and corrosion.

The "MassFlow" incorporates shelf mat inserts that are modular and can be divided almost indefinitely to accommodate any style of beverage packaging. The shelf mat is ribbed and reinforced to accommodate heavy loadings and allows an easy "slide" surface ensuring that the product is always displayed at the front of the shelf. Comes complete with height adjustable feet for ease of installation and levelling as required. Will accommodate wash down areas with inclined floors.

Novalok "MassFlow" is New Zealand manufactured and available as required. A normal 2-3 week lead time is required from date of order to supply. A full installation service is available if required.

COMPLIANCE

Novalok "MassFlow" has been specifically developed for high usage retail beverage picking. Heavy duty and compliant with New Zealand food hygiene regulations. Novalok "MassFlow" is ideal in stadiums, retail outlets and other sites where high product visibility coupled with functionality and robustness is essential.

SIZES AVAILABLE (Note: custom sizes also available)

Novalok "MassFlow" is manufactured here in New Zealand and can be supplied either in standard sizing or customised to suit any application. Standard Mass Flow sizing is as follows:

Specifications & Options (mm)

Height	Length of Module	Depth	No. of Levels
1500	600·800·900·1000·1200·1400·1600·1800	700	5
1800	600·800·900·1000·1200·1400·1600·1800	700	6
2100	600·800·900·1000·1200·1400·1600·1800	700	7
