

# NOVALOK

ADVANCING INNOVATION

MODULAR | ADJUSTABLE  
**VERSATILE**

Shelving ideal for food products  
and hospital sterile storage

## Stainless Steel Shelving.

*Stainless steel is a premium finish, providing the ultimate in corrosion resistance.*

Novalok is the only manufacturer in New Zealand of a modular, adjustable, stainless steel shelving system. Market leader in ventilated shelving systems for the food-service and healthcare markets. Stainless steel is undisputed as the ultimate material for hospital sterile storage, and food products storage.

### A VARIETY OF SHELF PANEL OPTIONS ARE AVAILABLE

- Galvanised Steel, Powder coated or Stainless Steel options
- Novex
- MDF and particle board
- Solid Panel inserts

Novalok stainless steel is made to the same design as the popular and proven Novalok Duoguard 'Z Series' shelving system, using the same punched post and locking cleat design, but made entirely of 304 grade stainless steel with a bright 'electro-polished' finish.

Novalok stainless steel is used where the requirement is for the very best, and nothing less will do, or in highly corrosive environments, or where the highest level of sanitation is required.

It is a very versatile system and is able to be made to a huge range of sizes and variations. As Novalok stainless steel is made in our own factory, we are able to be very flexible with sizing. Also, all stainless steel orders are 'made to order' there is no stock carried, and delivery times are usually 2-3 weeks depending on the size of order.
